                                                      melanocytes.

--- DISEASE: Defects in MATP are the cause of oculocutaneous albinism type 4 (OCA4). OCA4 is characterized by hypopigmentation of skin, hair and eyes. It leads to reduced visual acuity.
--- SIMILARITY: BELONGS TO THE SUGAR TRANSPORTER FAMILY.
--- CAUTION: Ref. 2 sequence differs from that shown due to a frameshift in position 188.
--- CAUTION: The described alternatively spliced isoforms are infered using information from ests.
similarity).
ALTERNARIVE PRODUCTS: At least 3 isoforms; AIM-1a (shown here), AIM-1b and AIM-1c; are produced by alternative splicing.
TISSUE SPECIFICITY: Expressed in most melanoma cell lines and
